QUALIFICATIONS SUMMARY

Over 15 years experience as a Welder, Millwright, Lead General Foreman, and Construction Superintendent. Projects have included supervision of large construction projects throughout the southeast United States Africa, and Iraq. Valid U.S. Passport. Current vaccinations for most countries. Basic computer knowledge in Windows, Word, QTrax, and Lotus.

RELEVANT PROJECT EXPERIENCE

8/2007 to 9/2008 ProEnergy Services as a Mechanical Supervisor/ Procurement Ordering all tools and equipment and supervising crafts rebuilding and commissioning a power facility in Ghana. From 8/21/07 to 8/2/08

05/2004 to 8/2007. Acadian Contractors, Abbeville, LA. **Superintendent / Project Manager** repairing oil rigs in the Gulf of Mexico. Supervise crews to complete repairs on the oil rigs. Responsibilities include ordering all materials, crew transportation, staff recruitment, and inspection of completed work.

12/2003 to 04/2004. Electrical & Instrumentation Unlimited of California, Inc., Bakersfield, CA. Subcontract under KBR, Power Plant Rebuild Power project in Basrah, Iraq. *Pipe Welder / Fitter*. Then worked in Kuwait on a Power project and on three projects for Rebuild Iraqi Oil Systems north of Basrah. Projects were grassroots and construction included all civil, electrical, and

mechanical systems from the ground up. Responsibilities included welding, quality control, staff recruitment, pulled concrete core samples, visual inspection of site prep and foundation after concrete pour, completed and inspected welds for all underground piping, installed conduit and cables, operated heavy lifts and rigging, set alignment between turbines and the generators, and set alignments on all small pumps.

05/1989 to 08/2003. Zachry Construction Company, San Antonio, TX. Employed in the following various capacities.

➤ 1999 to 2003. *General Foreman / Lead General Foreman* on various jobs around the country. Projects included construction of 15 Heat Recovery Steam Generators (HRSG). Supervised 12 to 500 employees during the construction of the facilities. Projects were grassroots and included all aspects of construction from underground utilities, civil, mechanical, systems, sandblasting, and painting. Worked with engineers and provided information for the design and schedule of construction of the HRSG.

➤ 1990 to 1999. Trained to weld, fabricate pipe and structural steel. Read blue prints, operated forklifts, hydraulic cranes, planned, scheduled, and bid jobs.

➤ 1989 to 1994. *Millwright Helper* at the International Paper Company's paper mill in Natchez, MS. Responsibilities included maintaining all mechanical and electrical systems within International Paper. In 1990, was trained on the Opti Align Laser but can also align with dial indicators using reverse alignment.
